Funded PhD position in Macroecology: Spatial and Temporal Scaling of Biodiversity and Environment

We have a vacant, fully funded PhD position in macroecology within the Research Training Group 1644 "Scaling Problems in Statistics" funded by the German Research Foundation. The position is a 75 % E 13 TV-L position according to the German public service and funded for three years. The tentative topic is "Spatial and Temporal Scaling of Biodiversity and Environment". For details see: See https://www.uni-goettingen.de/en/421234.html

Best regards

Holger Kreft
