Position available: PhD Research Assistantship in Plant Community Ecology

The Department of Earth and the Environment (https://earthenvironment.fiu.edu/) at Florida International University has a Ph.D. assistantship available for a student interested in plant community ecology. The ideal candidate will have some experience in vegetation ecology, vegetation-environment relationships, and geographic information systems (GIS). The research will focus on ecological processes involved in vegetation responses to change in hydrologic and fire regimes in both short- and long-hydroperiod ecosystems in the Florida Everglades. Assistantship covers stipend of $23,460 and tuition. To be eligible for the position, students must meet FIU graduate admission requirements: http://gradschool.fiu.edu/admission-requirements.shtml (select Earth Systems Science). The deadline for the graduate (PhD) application for Spring 2018 admission in the Department of Earth & Environment is Aug 1st, 2017.

To be considered for Spring 2018 admission with PhD Research Assistantship, please reply by May 31st, 2017 to Dr. Jay Sah (sahj@fiu.edu) with a CV and statement of interest.

FIU is a public research university in Miami with a highly diverse, vibrant, and growing student body located near the eastern boundary of the Everglades. For information about Florida International University, go to http://www.fiu.edu/index.htm

For information about our past and ongoing projects, find the South Florida Terrestrial Ecosystem homepage from the SERC website (http://sercweb.fiu.edu/), or go to http://softel.fiu.edu/
