Topic: The poster will cover your project. Content will be a subset of the final written report, chosen to highlight the most important aspects of the project in a visually interesting and attractive way.

Format and Style: Format and style should follow the many good examples on display in the hallways of Science II. Some general guidelines to follow include:
- The overall poster should be visually interesting and attractive
- Pictures are worth a thousand words
- Text should be no smaller than one-quarter inch; three-eighths inch is even better
- Minimize long passages of written text; use bullet points wherever possible

Date: The poster is due by 5:00PM April 21. Instructions for poster printing will be given prior to the due date.

Grading: Grading criteria will be how well you follow the format and style guidelines detailed above.
