2 tenure track positions in Agronomy, Purdue University.

The department of agronomy at Purdue University in West Lafayette, Indiana is seeking applications for two Assistant/Associate Professors of Agronomy emphasizing the use of modelling and prediction. Candidates should bridge the modeling and empirical world to be competitive. Two positions are available: 1) focused on improving yield potential and agronomic performance of crop plants and; 2) focused on interactions of crops with the environment.

Please share this posting with anyone you think would be a good candidate for these positions.

Thanks,
Gordon McNickle,
Assistant Professor,
Botany and Plant Pathology,
Purdue University.
