

Summer Student Employment

Undergraduate Research Assistant

Job Description:

Assistants needed for summer field and laboratory work for the soybean entomology lab. Tasks can include counting aphids, sampling for insects, collecting and sorting insects, or assembling field equipment such as cages and nets. Candidates could be asked to help maintain colonies of aphids throughout the summer. In addition, candidates could participate in conducting laboratory assays to test for insecticide resistance in the soybean aphid. Please apply via email and attach a resume with application.

Job Requirements:

Responsibility, punctuality and an ability to work with minimum supervision are required. An entomology or biology background is preferred but not necessary. Hourly pay rate increases during the summer are typical and will depend on job performance and additional training. No prior experience is required as training will be provided.

Pay Rate:

\$11.00/hour

Position Duration:

June 1st - September 30th

Full-time

30-40 hrs a week

Soybean Entomology Lab
