Assistant Professor - Human Dimensions of Wildlife Biology

The Department of Biology at Texas State University (www.bio.txstate.edu) invites applications for a tenure-track Assistant Professor in human dimensions of wildlife biology and conservation. The successful candidate will be expected to teach both graduate and undergraduate courses related to wildlife and natural resource management, focusing on human dimensions and conservation aspects, and develop an externally funded research program involving graduate students that complements existing strengths of our 50-member faculty.

Required qualifications are an earned Ph.D. in wildlife ecology, biology, environmental education, or related areas, and a record of peer-reviewed publications in human dimensions of natural resources.

Preferred qualifications include postdoctoral (or equivalent) experience, demonstration of research experience and a record of externally funded research in human dimensions such as wildlife/conservation outreach, stakeholder engagement and application of theoretical and empirical findings to real-world, contemporary problems.

Salary and start-up package are negotiable. For full consideration, all application materials must be received by November 1, 2017. Only applications submitted through the Texas State University website, https://jobs.hr.txstate.edu/postings/ will be accepted and considered. Interested applicants should submit the following materials 1) letter of application with statements on research plans and teaching philosophy, 2) CV, 3) PDFs of five representative publications, and 4) the names and contact information of five people willing to serve as references. Questions about this position should be addressed to Dr. M. Clay Green, claygreen@txstate.edu (512) 245-8037, Texas State University, 601 University Drive, San Marcos, TX 78666.

Texas State University is an Affirmative Action/Equal Opportunity Employer.
