UC Merced invites applications for one tenure track faculty position in the Department of Management of Complex Systems. We seek scholars who can contribute to the cross-functional research environment at UC Merced. We are particularly interested in individuals with interests and expertise in sustainability, natural resource management or lands management, and with applications for profit and non-profit enterprises and/or public entities. Exceptional candidates in areas such as wildfire science and management, urban sustainability, city planning, green infrastructure, natural hazards, institutions, life cycle analysis, disaster response, human dimensions of natural resource management, adaptation, resilience, wildland-urban interface, impact assessment, protected areas, the water-carbon-energy nexus, data analytics and complexity, and other innovative and relevant application areas are also encouraged to apply. Competitive candidates will have an interest in creating new programs, particularly interdisciplinary programs in management-related areas. Demonstrated or strong potential for excellence in scholarship and teaching, and Postdoctoral or teaching experience is preferred. We encourage applications from candidates who have cross-functional or multi-disciplinary research interests.
