M.S. Graduate Research Assistantship – Recirculating Systems and Aquaponics

**Location:** Frankfort, Kentucky

**Company:** Kentucky State University

**URL:** http://www.ksuaquaculture.org/

**Salary:** $22,000/year, student is responsible for tuition and fees.

**Description:** Join a productive team of researchers examining some of the most exciting topics in aquaculture! Topics include year-round shrimp production, recirculating systems design, water quality management, aquaponics, denitrification, and more. Specific duties will include but are not limited to system construction, water quality analysis, animal husbandry, data collection and analysis, report preparation, professional presentations at national conferences, and preparing publications.

**Qualifications:** This is a Master of Science (MS) student Research Assistantship to support a MS student in Aquaculture. The student must first be accepted into the M.S. in Aquaculture and Aquatic Sciences academic program before qualifying for this position. This opportunity is open to US citizens and those with current legal ability to work in the US. The candidate will have a Bachelor of Science degree in aquaculture, biology, aquatic sciences, marine biology, fisheries, biological oceanography, or a related field. Relevant experience is preferred, especially in aquaculture, animal husbandry, or agriculture.
