MS position on Ecosystem Services of Wild and Scenic Rivers

The School of Earth Science and Environmental Sustainability (SESES) at Northern Arizona University (NAU) seeks a graduate research assistant (GRA) at the Masters level interested in investigating the “Ecosystem Services of Wild and Scenic Rivers.” The two-year GRA position will begin in fall 2018 and is part of a National Parks Service (NPS)-funded research project through the Colorado Plateau Cooperative Ecosystem Studies Unit at NAU (see for details: https://nau.edu/cefns/forestry/cpcesu/) The assistantship provides a 9- month stipend, tuition waiver, and health insurance for the first year. This position will be extended as a teaching assistantship for an additional year or if funding permits, as a research assistantship. The GRA will work under the direct supervision of Dr. Denielle Perry. The Fall application deadline for SESES is January 15th, though earlier submissions are encouraged. Interested applicants should send a brief letter of interest and a copy of their CV (including GPA and GRE scores) via email to Denielle.Perry@nau.edu prior to formally applying to the NAU Graduate School.

Northern Arizona University’s School of Earth Sciences and Environmental Sustainability draws upon faculty and professionals in the natural and social sciences to combine outreach and educational programs addressing the diverse needs of stakeholders with undergraduate degrees in environmental sciences, environmental studies, and geology.
