

## NSF funded PhD opportunity in animal physiology and community ecology

The Warne Lab at Southern Illinois University is seeking a highly motivated PhD student to work on a collaborative NSF funded study testing how changes in animal physiology and foraging behavior feedback to affect plant community ecology. The research will focus on kangaroo rats and their grassland communities in New Mexico, and will include the experimental manipulation of endocrine physiology along with use of digital telemetry, and stable isotopes. The student will work with both Dr. Robin Warne and Dr.

Justin Boyles in the Zoology Department at Southern Illinois University.

The start date for the position is January 1, 2018. Apply by October 16th for full consideration.

For inquiries or to apply, please send a cover letter and CV to Dr. Robin Warne ([rwarne@siu.edu](mailto:rwarne@siu.edu)).

Our labs are highly research active, and we collectively maintain a strong and diverse cohort of undergraduate and graduate researchers. More information can be found at <http://warnelab.weebly.com/> and <http://www.boyleslab.com/>.
