Post-doc Food Web Modeling

A fully funded, three year post-doc is available in Dr. Andrew Beckerman's lab in the Department of Animal and Plant Sciences at The University of Sheffield, United Kingdom. The project will explore how we can predict and generalise about the effects of multiple, simultaneous stressors on large food webs using a platform linking the bioenergetic food web model and the allometric diet breadth model. We are looking for a candidate with experience in modeling and an interest in food web structure, complexity and dynamics.

More details on the project and team of researchers involved can be found here: https://andbeck.github.io/beckslab/work_with_us

Informal enquiries are welcome (a.beckerman@sheffield.ac.uk).

A full application (Jan 14 deadline) can be made here: http://bit.ly/2V1GtRp
