The **Rhode Island Consortium for Coastal Ecology, Assessment, and Innovation** (RI C-AIM) is seeking candidates for one or more Postdoctoral Fellowship positions that bridge key research areas being pursued by RI C-AIM in STEM fields. These positions, based at the **University of Rhode Island**, will be collaborative in nature and can span multiple RI C-AIM institutions. Candidates will also receive professional development through select activities and a mentoring partnership with one of our faculty researchers.

**Funding:** $50k annual salary, plus benefits, $10k annual stipend for research expenses, including materials and travel

**Supported research themes:** Modeling coastal marine ecosystems, biological approaches to novel paper-based sensors, ecology of marine plankton in coastal zones, failure detection in coastal sensor networks

**Deadlines:** Thursday, January 31, 2019, first consideration, and Thursday, February 28, 2019, second consideration. It is anticipated that RI C-AIM Postdoctoral Fellows will begin by June 1, 2019.

Please view our applications instructions, as well as the full advertisement on our website and submit all required materials to RI C-AIM Project Administrator Sally J. Beauman at sbeauman@uri.edu. RI C-AIM is supported by RI NSF EPSCoR, Award #OIA-1655221.
