**Silviculture Library: Prescribed fire case study specialist**

To increase the knowledge of and interest in the use of prescribed fire as a silvicultural tool, and the process by which it is implemented, we are hiring an undergraduate intern to develop five new case studies detailing the silvicultural use of fire in Minnesota and Wisconsin pine- and oak-dominated forests for publication on the Great Lakes Silviculture Library (GLSL). Case study preparation will involve communicating with resource managers including foresters and fire managers to collect data and write up concise descriptions of forest management goals, objectives, prescriptions, and outcomes (like this example). We expect the intern to visit each case study site to meet with the land manager(s) and fire lead(s) and to gather photographs and data as needed to write the case study.

Strong communication skills and comfort reaching out to professional land managers are essential to success in this position. We expect the intern to primarily work remotely, in frequent contact with supervisor Eli Sagor (Cloquet Forestry Center and St Paul campus) and collaborators Marcella Windmuller-Campione (UMN-FR), Kyle Gill (CFC), and Lane Johnson (CFC). This position requires approximately 10% travel to visit field sites, including some overnight travel. Office space may be available at the Cloquet Forestry Center for a portion of the summer if desired.

This position will be approximately 40 hours per week at a pay rate of $15/hour.

To apply, send a current resume or CV, along with a short statement about yourself and why the internship interests you, to Eli Sagor at esagor@umn.edu. Feel free to contact Eli in advance with any questions about the position by email or phone / text at (218) 409-6115. Applications are due by Sunday, February 14.
