**POSITION:**

Waterfowl Research Technician, 1 position

**START & END DATE:**

6 Apr – 31 Aug, 2020

**PAY RATE:**

Commensurate with experience

**LOCATION:**

Walden, Colorado

Housing (bunkhouse or camp trailers) will be provided.

**DEADLINE FOR APPLICATIONS:**

25 Jan 2020

**JOB DESCRIPTION:**

I am seeking one technician to assist with a project assessing waterfowl production in North Park, Colorado. The work will involve duck nest searches and monitoring, pair/brood surveys, banding, and wetland vegetation and habitat monitoring. Technicians will primarily be involved with capturing ducks and marking them with transmitters early in the season. Technicians will work 40 hours/week with early mornings and irregular schedules.

**MINIMUM REQUIREMENTS:**

Applicants should possess a B.S. in wildlife science or related field. Preference will be given to applicants proficient in duck and plant identification and with experience working in buggy, muddy, and tedious conditions. Experience with ATVs, 4WD vehicles, and driving with trailers is desirable. Technicians should be able to work independently with minimal supervision and learn their way around the study site quickly.

**HOW TO APPLY:**

Email cover letter, resume, and contact information for three references to Casey Setash (csetash@rams.colostate.edu) by January 25th.
