

Forestry Curriculum proposal procedures:

All changes in policies and significant changes in degree programs such as changes to core courses, adding/removing or significantly modifying options or programs (significant elements of Degree Audits), graduation requirements, course numbers and major changes in course content will be considered by the committee. Proponents of such changes will include information on both the advantages and disadvantages of proposed changes, and distribute relevant materials to committee members at least two weeks prior to consideration for action. Decisions will be made based on support from a simple majority of program curriculum committee members to forward proposals to the departmental Curriculum and Catalog Committee. The vote of the program curriculum committees is advisory to the departmental committee. Proposed changes with support of the departmental curriculum committee will be distributed to the entire voting faculty two weeks prior to discussion and consideration by the voting faculty.
